SUMMARY

Data professional with 13+ years of experience delivering actionable insights and scalable data solutions. Skilled in building predictive models, automating workflows, and designing KPI dashboards that cut reporting time by 40% and improved forecasting accuracy by 25%. Adept at transforming complex datasets into business intelligence that drives decision-making and operational efficiency. Seeking to leverage expertise as a **Data Solutions Analyst** to support global teams in optimizing data-driven strategies.

SKILLS

- SQL, Python, Power BI, Excel
- Data Cleaning & Transformation
- KPI Dashboards & Reporting Automation
- Pandas, Matplotlib, Scikit-Learn
- GitHub, Azure Data Studio, SPSS

WORK HISTORY

Freelance Data Analyst | Founding Teams | 09/2025 – Present

- Designed and deployed Power BI dashboards that reduced reporting time by 40%.
- Automated workflows with Python and SQL, saving 10+ hours monthly.

Data Analyst Intern | LS Academy | 02/2024 – 08/2025

- Built ML model with 85% accuracy to predict customer churn, supporting retention strategies.
- Cleaned and transformed 10,000+ rows of data using SQL and Pandas for accurate reporting.

Data Science Instructor | Lagos Data School | 01/2025 – 12/2025

- Taught Python, SQL, Power BI, and ML to 100+ students; 30+ secured remote jobs.
- Designed 10+ real-world projects, including churn prediction and budget tracking.

- Mentored professionals in applying analytics to solve business problems.

Educationist/Trainer | Redav College | 11/2020 – 01/2025

- Delivered eLearning modules to 200+ students.
- Integrated data tools into teaching, improving performance tracking by 25%.

Customer Service Specialist | H2 Technologies & Almond Glory | 01/2010 – 01/2018

- Handled 100+ client inquiries weekly with 98% satisfaction rate.
- Trained junior staff in CRM tools and technical support workflows.

PROJECTS

SmartBudget Pro – Financial Analytics Tool

- Designed and deployed a financial analytics application to automate budget tracking.
- Reduced manual reporting effort by 40% and improved accuracy of expense forecasting.
- Visualized spending trends with Power BI dashboards, enabling better financial decisions.

Customer Churn Prediction – Machine Learning Model

- Built a predictive model with 85% accuracy using Scikit-Learn to identify at-risk customers.
- Integrated insights into Power BI dashboards, helping stakeholders monitor churn trends.

KPI Dashboard Development – Business Intelligence

- Created interactive KPI dashboards in Power BI for three departments.
- Improved visibility of performance metrics and reduced reporting delays.

EDUCATION

- PGDE, National Teachers Institute, 2025
- BSc Chemistry, University of Maiduguri, 2007
- Data Science Certificate, LS Academy, 2025
- Nigerian Institution of Management (NIM), 2009

HOBBIES & INTERESTS

- Researching emerging data science tools and Building hands-on data projects
